

Would you please leave Indiana's Telephone Privacy law just as written. The change it has made to my privacy has been incredible. If the large number of people signing up for it is any indicator, it should tell you people do not want telemarketers calling them at home. Furthermore I pay for my telephone line, why should I have to pay for caller I D just to be able to stop unsolicited calls when I already pay for a unlisted telephone number. Please do not interfere with what is working.

Thank You
